Author Index

Ai, M.
Reaction of acetic acid with methanol over vanadium–titanium binary phosphate catalysts in the presence of oxygen 227
Arata, K.
–, and Hino, M.
Solid catalyst treated with anion: XVIII. Benzoylation of toluene with benzoyl chloride and benzoic anhydride catalysed by solid superacid of sulfate-supported alumina 197
Arata, K., see Matsuhashi, H. 205
Asakawa, H., see Shimokawabe, M. 45
Auroux, A., see Briot, P. 141

Banerjee, A.A.
–, and Mukesh, D.
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1
Beck, H.P., see Wiesgickl, G. L1
Bittar, A., see Coq, B. 103
Blanchard, M.
–, Wendlinger, L. and Canesson, P.
Heterogeneous catalytic reactions of chlorofluorocarbons 123
Bouyssieres, L., see Gil Llambias, F.J. 185
Briot, P.
–, Auroux, A., Jones, D. and Primet, M.
Effect of particle size and the reactivity of oxygen-adsorbed platinum supported on alumina 141
Bun, S.
–, Nishiyama, S., Tsuryua, S. and Masai, M.
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13

Cai-Hong Yang., see Ding-Zhu Wang 75
Canesson, P., see Blanchard, M. 123
Carcia, H., see Corma, A. 333

Subject Index

Acetal formation
Formation and hydrolysis of acetals catalysed by acid faujasites 333

Acetal hydrolysis
Formation and hydrolysis of acetals catalysed by acid faujasites 333

Acid sites
Solid catalyst treated with anion: XVIII. Benzoylation of toluene with benzoyl chloride and benzoic anhydride catalysed by solid superacid of sulfate-supported alumina 197

Acid sites
Solid catalyst treated with anion: XIX. Synthesis of the solid superacid catalyst of tin oxide treated with sulfate ion 205

Acid sites
Extraction of extra-framework aluminium in ultrastable Y zeolites by $(NH_4)_2SiF_6$ treatments. I. Physicochemical characterization 267

Acid sites
Formation and hydrolysis of acetals catalysed by acid faujasites 333

Acidity
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75

Adsorption
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13

Adsorption
Effect of particle size and the reactivity of oxygen-adsorbed platinum supported on alumina 141

Adsorption
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311

Ageing
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75

Ageing
Effect of hydrothermal treatment on alumina as support for noble metal catalysts 89

Ageing
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31

Ageing
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291

Aldehyde condensation
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237

Aldol condensation
Reaction of acetic acid with methanol over vanadium–titanium binary phosphate catalysts in the presence of oxygen 227

Alumina
Solid catalyst treated with anion: XVIII. Benzoylation of toluene with benzoyl chloride and benzoic anhydride catalysed by solid superacid of sulfate-supported alumina 197

Ammonia synthesis
Iron-based ammonia synthesis catalysts prepared via non-oxidic precursors 249

Ammoxidation
Ammoxidation of toluene over coke-covered alumina 129

Aniline
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31

Barium/calcium oxide
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291

Caesium
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237

Carbon dioxide
Effects of carbon dioxide and catalyst preparation on the oxidative dimerization of methane 213

Carbon monoxide
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165

Carbon monoxide adsorption
Determination of the accessible metallic surface of supported platinum: Quantitative infrared spectroscopic study of carbon monoxide adsorption 153
Catalyst characterization (adsorption, DRIFT, DTG, TEM, XPS)
Preparation of silica-supported copper catalysts by means of deposition–precipitation 275
Catalyst characterization (adsorption)
Effect of hydrothermal treatment on alumina as support for noble metal catalysts 89
Catalyst characterization (adsorption)
Effect of particle size and the reactivity of oxygen-adsorbed platinum supported on alumina 141
Catalyst characterization (chemical trapping, IR, TPD)
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165
Catalyst characterization (DTA, TPR, UV-VIS-NIR, XRD)
Characterization of copper/zirconia catalysts prepared by an impregantion method 45
Catalyst characterization (EPMA, t-plot)
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311
Catalyst characterization (ESR, IR)
Ammoxidation of toluene over coke-covered alumina 129
Catalyst characterization (ESR, TG-DTA, TPD, XRD)
Oxidative coupling of methane over $Y_2O_3–CaO$ catalysts 59
Catalyst characterization (IR, Mössbauer, XPS)
Iron-based ammonia synthesis catalysts prepared via non-oxidic precursors 249
Catalyst characterization (IR, TPD, XRD)
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291
Catalyst characterization (IR, XRD)
Extraction of extra-framework aluminium in ultrastable Y zeolites by $(NH_4)_2SiF_6$ treatments. I. Physicochemical characterization 267
Catalyst characterization (IR)
Determination of the accessible metallic surface of supported platinum: Quantitative infrared spectroscopic study of carbon monoxide adsorption 153
Catalyst characterization (IR)
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237
Catalyst characterization (XPS)
Solid catalyst treated with anion: XVIII. Benzoylation of toluene with benzoyl chloride and benzoic anhydride catalysed by solid superacid of sulfate-supported alumina 197
Catalyst characterization (XRD)
Solid catalyst treated with anion: XIX. Synthesis of the solid superacid catalyst of tin oxide treated with sulfate ion 205
Catalyst preparation (coprecipitation)
Oxidative coupling of methane over $Y_2O_3–CaO$ catalysts 59
Catalyst preparation (impregnation, ion exchange)
Effect of hydrothermal treatment on alumina as support for noble metal catalysts 89
Catalyst preparation (ion exchange)
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237
Catalyst preparation (ligand exchange)
Hydrogenolysis and isomerization of alkanes on Ru/Al_2O_3 catalysts of varying dispersions 103
Catalyst preparation (metallic complex adsorption)
Iron-based ammonia synthesis catalysts prepared via non-oxidic precursors 249
Catalyst preparation (organic compound, use of)
Reaction of acetic acid with methanol over vanadium–titanium binary phosphate catalysts in the presence of oxygen 227
Catalyst preparation (precipitation)
Preparation of silica-supported copper catalysts by means of deposition–precipitation 275
Catalyst preparation (solid-state reaction)
Novel type of catalyst for the pure dehydrogenation of methanol to formaldehyde L1

Catalyst preparation (sulfate treatment)
Solid catalyst treated with anion: XIX. Synthesis of the solid superacid catalyst of tin oxide treated with sulfate ion 205
Catalyst preparation (UV iradiation)
Effects of carbon dioxide and catalyst preparation on the oxidative dimerization of methane 213
Catalyst preparation (wet impregnation)
Characterization of copper/zirconia catalysts prepared by an impregantion method 45
Chlorofluorocarbons
Heterogeneous catalytic reactions of chlorofluorocarbons 123
Chromium
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Chromium oxide/aluminium trifluoride
Heterogeneous catalytic reactions of chlorofluorocarbons 123
Chromium oxide/charcoal
Heterogeneous catalytic reactions of chlorofluorocarbons 123
Coke/alumina
Ammoxidation of toluene over coke-covered alumina 129
Coke formation
Ammoxidation of toluene over coke-covered alumina 129
Coke formation
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Coke formation
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75
Copper/silica
Preparation of silica-supported copper catalysts by means of deposition–precipitation 275
Copper/zeolite
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13
Copper/zinc oxide–alumina
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165
Copper/zinc–alumina
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165
Copper/zirconia
Characterization of copper/zirconia catalysts prepared by an impregantion method 45
Cracking
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75
Cracking
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311

Deposition–precipitation
Preparation of silica-supported copper catalysts by means of deposition–precipitation 275
Dispersion
Hydrogenolysis and isomerization of alkanes on Ru/Al_2O_3 catalysts of varying dispersions 103
Dispersion
Characterization of copper/zirconia catalysts prepared by an impregantion method 45

Equilibrium adsorption method
Hydrodesulfurization activity of WO_3/γ-alumina prepared by the equilibrium adsorption method 185
Ethanol conversion
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13
Ethene
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13
Extra-framework aluminium
Extraction of extra-framework aluminium in ultrastable Y zeolites by $(NH_4)_2SiF_6$ treatments. I. Physicochemical characterization 267
Faujasites
Formation and hydrolysis of acetals catalysed by acid faujasites 333

Fluorination
Heterogeneous catalytic reactions of chlorofluorocarbons 123
Formaldehyde
Novel type of catalyst for the pure dehydrogenation of methanol to formaldehyde L1
Formate
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165

Gasoline
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75

Hexane conversion
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311
Hydrodesulfurization
Hydrodesulfurization activity of WO_3/γ-alumina prepared by the equilibrium adsorption method 185
Hydrogenolysis
Hydrogenolysis and isomerization of alkanes on Ru/Al_2O_3 catalysts of varying dispersions 103
Hydrothermal treatment
Effect of hydrothermal treatment on alumina as support for noble metal catalysts 89

Ion exchange
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13
Iron/alumina
Iron-based ammonia synthesis catalysts prepared via non-oxidic precursors 249
Isomerization
Hydrogenolysis and isomerization of alkanes on Ru/Al_2O_3 catalysts of varying dispersions 103

Kieselguhr
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Kinetics
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Kinetics
Hydrogenolysis and isomerization of alkanes on Ru/Al_2O_3 catalysts of varying dispersions 103
Kinetics
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1
Kinetics
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13
Kinetics
Heterogeneous catalytic reactions of chlorofluorocarbons 123
Kinetics
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311
Kinetics
Formation and hydrolysis of acetals catalysed by acid faujasites 333
Kinetics
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237
Kinetics
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291

Lithium
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237
Lithium/magnesia
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291
Lithium–sodium aluminate
Novel type of catalyst for the pure dehydrogenation of methanol to formaldehyde L1

Methane dimerization
Effects of carbon dioxide and catalyst preparation on the oxidative dimerization of methane 213

Methane oxidative coupling
Oxidative coupling of methane over Y_2O_3–CaO catalysts 59
Methane oxidative coupling
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291
Methanol dehydrogenation
Novel type of catalyst for the pure dehydrogenation of methanol to formaldehyde L1
Methanol synthesis
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165
Methylpentane conversion
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311
Monolayer structure
Hydrodesulfurization activity of WO_3/γ-alumina prepared by the equilibrium adsorption method 185
Multilayer structure
Hydrodesulfurization activity of WO_3/γ-alumina prepared by the equilibrium adsorption method 185

Nickel
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Nitrobenzene hydrogenation
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Nitrodiphenylamine
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1

Oxidative coupling
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291
Oxidative dimerization
Effects of carbon dioxide and catalyst preparation on the oxidative dimerization of methane 213

Palladium
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1
Particle size
Effect of particle size and the reactivity of oxygen-adsorbed platinum supported on alumina 141
Phenylenediamines
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1
Platinum/alumina
Effect of particle size and the reactivity of oxygen-adsorbed platinum supported on alumina 141
Platinum/alumina
Determination of the accessible metallic surface of supported platinum: Quantitative infrared spectroscopic study of carbon monoxide adsorption 153
Platinum/ceria
Determination of the accessible metallic surface of supported platinum: Quantitative infrared spectroscopic study of carbon monoxide adsorption 153
Platinum/niobia
Determination of the accessible metallic surface of supported platinum: Quantitative infrared spectroscopic study of carbon monoxide adsorption 153
Platinum–rhodium/alumina
Effect of hydrothermal treatment on alumina as support for noble metal catalysts 89
Potassium
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237
Propanol hydrogenation
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1

Raney nickel
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1
Regeneration
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31

Ruthenium/alumina
Hydrogenolysis and isomerization of alkanes on Ru/Al_2O_3 catalysts of varying dispersions 103

Selectivity (acetals)
Formation and hydrolysis of acetals catalysed by acid faujasites 333
Selectivity (acrylic acid, methyl acrylate)
Reaction of acetic acid with methanol over vanadium–titanium binary phosphate catalysts in the presence of oxygen 227
Selectivity (aniline)
Kinetic model of nitrobenzene hydrogenation to aniline over industrial copper catalyst considering the effects of mass transfer and deactivation 31
Selectivity (benzonitrile)
Ammoxidation of toluene over coke-covered alumina 129
Selectivity (C_{2+} hydrocarbons)
Oxidative coupling of methane over Y_2O_3–CaO catalysts 59
Selectivity (C_2 hydrocarbons)
Effects of carbon dioxide and catalyst preparation on the oxidative dimerization of methane 213
Selectivity (C_2 hydrocarbons)
Oxidative coupling of methane over Ba/CaO catalysts. A comparison with Li/MgO 291
Selectivity (ethene)
Ethanol conversion over ion-exchanged ZSM-5 zeolites 13
Selectivity (formaldehyde)
Novel type of catalyst for the pure dehydrogenation of methanol to formaldehyde L1
Selectivity (gas oil)
Hydrodesulfurization activity of WO_3/γ-alumina prepared by the equilibrium adsorption method 185
Selectivity (gasoline, high octane-)
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75
Selectivity (methanol)
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165
Sintering
Effect of hydrothermal treatment on alumina as support for noble metal catalysts 89
Sodium
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237
Sodium–lithium aluminate
Novel type of catalyst for the pure dehydrogenation of methanol to formaldehyde L1
Solid superacid
Solid catalyst treated with anion: XVIII. Benzoylation of toluene with benzoyl chloride and benzoic anhydride catalysed by solid superacid of sulfate-supported alumina 197
Solid superacid
Solid catalyst treated with anion: XIX. Synthesis of the solid superacid catalyst of tin oxide treated with sulfate ion 205
Surface area
Determination of the accessible metallic surface of supported platinum: Quantitative infrared spectroscopic study of carbon monoxide adsorption 153
Syngas conversion
Methanol synthesis on $Cu/ZnAl_2O_4$ and $Cu/ZnO–Al_2O_3$ catalysts: Influence of carbon monoxide pretreatment on the formation and concentration of formate species 165

Tin oxide
Solid catalyst treated with anion: XIX. Synthesis of the solid superacid catalyst of tin oxide treated with sulfate ion 205
Toluene ammoxidation
Ammoxidation of toluene over coke-covered alumina 129
Toluene benzoylation
Solid catalyst treated with anion: XVIII. Benzoylation of toluene with benzoyl chloride and benzoic anhydride catalysed by solid superacid of sulfate-supported alumina 197
Transfer hydrogenation
Heterogeneous catalytic transfer hydrogenation reactions of 4-nitrophenylamine 1
Tungsken oxide/alumina
Hydrodesulfurization activity of WO_3/γ-alumina prepared by the equilibrium adsorption method 185

Vanadium–titanium
Reaction of acetic acid with methanol over vanadium–titanium binary phosphate catalysts in the presence of oxygen 227

Yttrium oxide calcium oxide
Oxidative coupling of methane over Y_2O_3–CaO catalysts 59

Zeolites
Effect of acidity of HZSM-5 type zeolite on conversion of alkenes and alkanes to gasoline and aromatics 75

Zeolites
Zeolites as base catalysts: Condensation of aldehydes with derivatives of malonic esters 237

Zeolites
Formation and hydrolysis of acetals catalysed by acid faujasites 333

Zeolites
Limitation of n-hexane and 3-methylpentane conversion over zeolite ZSM-5 by intracrystalline diffusion 311

Zeolites
Extraction of extra-framework aluminium in ultrastable Y zeolites by $(NH_4)_2SiF_6$ treatments. I. Physicochemical characterization 267
